

GAC’S ALL-NEW GN6: THE ACCESSIBLE MPV MVP FOR FILIPINO FAMILIES

Space, comfort, turbocharged performance, and Level 2 safety from P1.198 million.

Filipino families today have a wider range of mobility options than ever before. While some prioritize space and everyday versatility, others place greater importance on comfort, technology, performance, or accessible pricing. Ultimately, the right vehicle is one that responds to a family’s particular needs, lifestyle, and budget.

Recognizing these different priorities, GAC Philippines recently introduced its expanded MPV Family, comprising the All-New GAC GN6, GAC E8 HEV, and GAC GN8 PHEV Executive. Together, the three models provide distinct mobility solutions for families at different life stages and price points.

As the most accessible model in the lineup, the All-New GN6 is thoughtfully designed for family life. From easier cabin access and comfortable three-row seating to flexible cargo space, connected technology, and advanced driver assistance features, the GN6 brings together the qualities families use and appreciate every day.

Built on GAC’s more than 10 years of MPV engineering experience and over 880,000 MPVs delivered worldwide, the GN6 brings together the space, comfort, versatility, technology, and safety that Filipino families value. This well-rounded combination earns it a place among GAC’s “MPV MVPs.”

Here are five ways the All-new GN6 provides more care and value for every family:

1. Space designed around the whole family

A family MPV must accommodate more than passengers. It needs to adapt to school runs, daily commutes, family gatherings, grocery trips, weekend activities, and long journeys out of town.

Measuring 4,792 mm long and built on a 2,810 mm wheelbase,

With 270 Nm of torque, the GAC GN6 delivers smooth, responsive performance for daily commutes and family road trips alike. The actual unit may vary from the photo shown

the GN6 provides comfortable seating for seven across three rows. Its cabin is arranged to give each passenger a more considered space, whether seated in front, in the second-row captain’s seats, or in the third row.

The independent second-row captain’s seats feature individual armrests, giving passengers a more comfortable and personal seating area. Easy cabin access also helps children, elderly family members, and passengers with limited mobility enter and exit the vehicle with less effort.

When more carrying capacity is needed, the third-row seats fold completely into the luggage floor to create a flat and practical cargo area. This expands cargo capacity from 324 liters to as much as 1,100 liters, allowing the GN6 to accommodate luggage, sports equipment, shopping, and other large items without requiring families to choose between passenger comfort and usable storage.

Dual-zone automatic climate control helps keep the cabin comfortable, while a PM1 air filter supports cleaner air circulation for everyone on board. A power sunroof adds to the open and welcoming feel of the interior.

Together, these features demonstrate how the GN6’s space is not simply measured in dimensions. It is designed around the different people, routines, and responsibilities that make up family life.

2. Family-focused Features

The GN6 gives Filipino families access to a combination of three-row space, comfort, technology, performance, and safety features in one vehicle.

Combining everyday practical versatility, exceptional range, and long-haul comfort, the GAC GN6 delivers a seamless driving experience for growing families. The actual unit may vary from the photo shown.

At the center of the cabin is a large 14.6-inch touchscreen display, complemented by a 10.25-inch digital instrument cluster. The two displays give the interior a clean, contemporary appearance while placing essential vehicle information and connectivity functions within easy view and reach of the driver.

Families also benefit from features that make everyday travel more comfortable and convenient, including the second-row captain’s seats, flexible fold-flat third row, dual-zone climate control, PM1 air filtration, and power sunroof.

Rather than focusing on equipment for its own sake, the GN6 brings these features together to support real family needs: keeping passengers comfortable, helping the driver stay informed, and allowing the cabin to adapt as plans change.

3. Turbocharged Performance for City and Highway Driving

Powering the GN6 is a 1.5-liter turbocharged gasoline engine producing 176.7 HP and 270 Nm of torque. It is paired with a seven-speed Wet Dual-Clutch Transmission, or 7WDCT.

This combination gives the GN6 the responsiveness needed for daily city driving, carrying a full complement of passengers, merging into faster traffic, and travelling on provincial roads. Its 270 Nm of torque provides useful pulling power when the vehicle is loaded with family members and cargo, while the transmission supports smooth and confident progress across different driving conditions.

The GN6 has a WLTC combined fuel-consumption rating of 7.22 liters per 100 kilometers, balancing its turbocharged performance with the everyday efficiency expected of a family vehicle.

4. Level 2 Advanced Assistance Safety for Greater Family Confidence

For a family vehicle, care also means supporting the driver and helping protect everyone inside.

The All-New GN6 GX is equipped with a comprehensive Level 2 Advanced Driver Assistance System, or ADAS. Its suite of driver-support technologies includes:

- Adaptive Cruise Control
- Traffic Jam Assist
- Integrated Cruise Assist
- Automatic Emergency Braking
- Forward Collision Warning
- Lane Keeping Assist
- Lane Departure Warning

These features assist the driver in monitoring traffic conditions, maintaining the vehicle’s position, and responding to potential hazards. They are complemented by a high-definition 360-degree panoramic camera, which provides greater visibility when parking, navigating narrow streets, or maneuvering in confined spaces.

The result is added confidence not only on highways and long journeys, but also during the everyday driving situations Filipino families encounter most often.

5. Straightforward and Convenient Everyday Ownership

The GN6 is designed to fit easily into established family routines. Its gasoline powertrain allows quick and accessible refueling, whether the vehicle is used primarily within the city or for longer trips across the country.

Ownership is supported by GAC Philippines’ nationwide network of 30 dealerships, dedicated local parts warehouse, and two years of free roadside assistance. The GN6 also comes with a five-year or 150,000-kilometer vehicle warranty, whichever comes first.

GAC’s local parts warehouse helps maintain a stable supply of genuine components and supports faster service turnaround times. GAC dealerships also operate according to GAC Global Sales & Service Way standards, providing customers with consistent technical and aftersales support throughout the vehicle’s lifecycle.

Equipped with a comprehensive Level 2 ADAS suite and a 360° HD camera system, the GAC GN6 provides total driving confidence and active safety for the whole family. The actual unit may vary from the photo shown.

The Bottom Line: An MPV that Puts Family Needs First

The All-New GN6 expands the choices available to Filipino families by offering a spacious, adaptable, and well-equipped seven-seater at an accessible price.

Its value is found not in any one feature, but in how its features work together: captain’s seats that make passengers more comfortable, fold-flat seating that creates room for changing family needs, a turbocharged engine that provides confident performance, and Level 2 ADAS that supports the driver on every journey.

Equipped with a comprehensive Level 2 ADAS suite and a 360° HD camera system, the GAC GN6 provides total driving confidence and active safety for the whole family. The actual unit may vary from the photo shown.

Within GAC Philippines’ broader MPV Family, the GN6 provides a compelling choice for households looking for everyday versatility, useful technology, thoughtful comfort, and advanced safety features from ₱1.198 million.

It is an accessible MPV designed to deliver more care for every family member.

Pricing

Reservations for the GN6 MPV are now open at GAC dealerships nationwide. The following Introductory pricing is available for reservations made until September 30, 2026.

The GN6 is available in Pearl White and Classic Black colors and with all-black interiors.

GAC has leveraged 20 years of collaboration with Toyota and Honda to emerge as a dominant force in automotive tech. A legacy of world-class manufacturing and hybrid expertise ensures that every GAC vehicle adheres to the most stringent quality and performance benchmarks. By harmonizing international engineering with localized precision, GAC delivers high-performance durability tailored specifically for the Filipino driver’s peace of mind.

GAC Philippines supports its owners through a nationwide network of 30 dealerships, a dedicated parts warehouse, two years of free roadside assistance, and tailored warranty coverage. ICE models (GS4, GS3 EMZOOM, EMKOO, GS8, EMPOW, M6 Pro, GN6, and M8) include a 5-year or 150,000 km warranty, whichever comes first. EV models (AION Y, Hyptec HT, AION UT, AION V, and AION ES) carry an 8-year or 160,000 km basic warranty, along with an 8-year or 200,000 km plan for the traction battery and electric drive, applicable up to the specified milestone. PHEV and HEV models (GS4 Max, E8, GN8, and GS8) offer a 5-year or 150,000 km basic warranty, complemented by an 8-year or 150,000 km policy covering the power battery, driving motor, and motor control unit.

UAAGI ON THE MOVE 2026: Electrified Vehicle Lineup Takes Over SM Megamall from September 3-6, 2026

Experience the power of choice with a massive showcase of hybrid and EV models from BAIC, Chery, Foton, Jetour, Jetour GAIA, and Radar.

UAAGI Auto Group, a leading force in the Philippine automotive industry, brings a curated new energy vehicle (NEV) lineup to SM Megamall for the fifth leg of its flagship roadshow series: UAAGI On the Move. This premier one-stop-shop vehicle display and test-drive extravaganza transforms the SM Megamall Fashion Hall into an electrified motoring mecca from September 3 to 6, 2026.

As the local automotive landscape rapidly evolves, UAAGI remains anchored to a singular core philosophy: giving the Filipino motoring public the power of choice. At a time when fuel economy and sustainability are top of mind, efficient and modern electrified mobility is the prudent consumer’s best bet. UAAGI On the Move delivers a comprehensive, multi-segment portfolio of NEVs engineered to suit every lifestyle and driving demand.

GLOBAL, ELECTRIFIED MOBILITY MADE ACCESSIBLE

Leg 3 of UAAGI On the Move features a multi-brand showcase from UAAGI’s esteemed stable:

- BAIC: Rugged, purpose-built off-roaders and stylish, tech-forward SUVs
- Chery: Feature-packed, accessible crossovers designed for modern urban families.
- Foton: Robust people carriers and powerhouse pickups built for heavy-duty performance.
- Jetour: Trendy, adventure-ready vehicles crafted for active lifestyles.
- Jetour GAIA: A premium, highly distinguished sub-brand raising the bar for sophisticated mobility.
- Radar: Cutting-edge, fully electric and plug-in hybrid pickup trucks defining the future of utility.

Visitors can get up close and personal with the latest flagship releases right at the SM Megamall Fashion Hall, where brand and product specialists will be on hand to demonstrate the innovative tech and engineering driving each marque.

THE ULTIMATE TEST DRIVE EXPERIENCE

Static displays tell only half the story. To truly appreciate the performance and refinement behind these modern electrified vehicles, UAAGI invites guests to take the wheel.

Test drives are available throughout the event duration. To participate, guests simply register at the main display area inside the Fashion Hall before heading to the main driveway to experience their chosen model. As a bonus, every successful test drive participant receives official branded merchandise from the respective brand they sample.

EXCLUSIVE PROMOS AND “LUCKY GACHA DRAW”

UAAGI On the Move 2026 is engineered to be the ultimate buying window, offering event-exclusive promos unavailable anywhere else:

- The Lucky Gacha Draw: Every vehicle reservation secured and verified during the four-day event qualifies buyers for a draw featuring up to P50,000 in cash discounts on their chosen unit.
